CAN YOU MATCH IT?

Match the job description to the occupation title. Find the job description below that best describes the occupation. Each job description has a number. Place the job description number in the box next to the occupation.

Architect

Plumber

Electrician

Heating, Air
Conditioning &
Refrigeration

Carpenter

Mason

1. This person provides professional services to individuals and organizations planning a construction project. They may be involved in all phases of development, from the initial discussion with the client through the entire construction process. Their duties require specific skills—designing, Engineering, managing, supervising, and communicating with clients and builders. Although they have traditionally used pencil and paper to produce design and construction drawings, they are increasingly turning to computer-aided design and drafting (CADD) technology for these important tasks.
2. This person employed by a building contractor must perform a variety of tasks associated with new construction, such as framing walls and partitions, putting in doors and windows, building stairs, laying hardwood floors, and hanging kitchen cabinets.
3. This person installs, connects, tests, and maintains electrical systems. Working with blueprints to indicate the location of circuits, outlets, load centers, panel boards, and other equipment is an essential part of the job.
4. This person must be able to maintain, diagnose, and correct problems throughout the entire heating, air-conditioning, and/or refrigeration systems. Although they are trained to do both functions, technicians often specialize in either installation or maintenance and repair. New technology, in the form of cellular “Web” phones that allow technicians to tap into the Internet, may soon affect the way technicians diagnose problems.
5. As part of the building trade industry this person works with concrete, which is one of the most common and durable materials used in construction jobs. Among the items they construct are decorative patios, floors, and sidewalks.
6. This person working in the construction industry installs and repairs the water, waste disposal, drainage, and gas systems. In addition, they also install fixtures – bathtubs, showers, sinks, etc. – and appliances such as dishwashers and water heaters
